Let's Start!

This layout is not user friendly!

Learning Outcome:

Interpret the technical design report, to determine the work plan during the phase of building the software, based on regulation and protocols established by the company.
Designs the graphic layout of the IT solution.

Can Do Statements:

- I can explain what a layout is.
- I can describe different design rules.

Ask your partner:

- What is the appropriate way to display information on a web page?
- What are some design techniques you need to take into account when creating a web page?

Let's Explore!

This is the new layout* for our web page!

*"Layout" is the way information is displayed on a web page, book, or magazine.

Instructions: Read the text below.

Thomas: Hi Stephanie, what are you up to?

Stephanie: Hi, I'm just checking how the new design for the web page is going to be.

Thomas: New design?

Stephanie: Yes, the boss told me that we'd better change the web page layout. It seems that most of our clients, as well as the company staff, have been complaining about it.

Thomas: I'm sorry; I don't know what a layout is. Will you tell me what it is?

Stephanie: Yes, of course. Layout is the appearance a web page has. It includes some aspects such as titles, colors, graphics, and information presented on the web page.

Thomas: I understand. Why are clients complaining about the web page?

Stephanie: Well, there are some rules you ought to follow to design a web page. The person in charge of designing the page previously didn't take them into account.

Thomas: What are those rules you refer to?

Stephanie: Let's imagine you are creating a web page. So, you might want to take into consideration aspects like legibility, alignment, and type size.

Thomas: How will those aspects help the web page improvement?

Stephanie: The idea is that the layout achieves a balance between the flow of information and the customer's eye movement. That's why you ought to have a good type size. That will help with the legibility and readability. If you want to establish a good communication with the viewer, you need to ask yourself: "Will customers have issues trying to read the information displayed?" That information, in this company's case, ought to be left aligned since it is the most common, easiest and most legible way for customers.

Thomas: Are there any other alignments?

Stephanie: Yes, there are right, central, and justified alignments.

Thomas: Will you instruct me?

Stephanie: Of course I will.

Let's Practice!

Let's practice using some words to talk about a layout.

Instructions: Find the missing words for each sentence in the wordsearch.

1. You might want to take into consideration aspects like alignment and r_____.
2. You ought to find a balance between the flow of information and the customer's eye movement. That will help with the l_____.
3. You might want to avoid using the left a_____ in this web page.
4. To read easily, you ought to have a good _____.
5. You had better check how the new d_____ for the web page is going to be.

L	K	B	V	C	E	J	J	S	E	U	N	N	F	B
I	E	Y	T	I	L	I	B	I	G	E	L	K	R	D
Y	T	X	F	L	I	W	A	L	J	O	Q	L	G	B

Let's Practice!

Stephanie describes the different design rules.

Instructions: Match the sentences from Column A with Column B. Read the sentences aloud. Check your pronunciation with your instructor.

COLUMN A

1. How will legibility and alignment help to the web page improvement?
2. How will a good type size help the web text presentation?
3. Will the customers have issues trying to read the information displayed?
4. How will the customers read more legible texts?
5. How will I know which the best alignment to use is?

COLUMN B

- a. In order to have a better legible text, you can use left aligned, right aligned, centered, and justified.
- b. The customers will have problems reading the information in the web page because it is not legible.
- c. The idea is that by having legibility and alignment, the layout achieves a balance between the flow of information and the customer's eye movement.
- d. Choosing the best alignment depends on the kind of text you have.
- e. A good type size will help with the legibility and readability.

Extension Activity

These are the rules you should never break.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Find information about design rules.
- Choose the most important rules.
- Create a friso to explain the rules you chose.
- Share and explain the rules to your partners.

Self-Assessment

Yes

No

- I find information about design rules.
- I express information through a friso.
- I support information to other people.

Target Words

- **design** (verb): to make or create something in a technical way
e.g. I'm just checking how the new design for the web page is going to be.
- **readability** (noun): characteristic of a text that can be read in a smooth way
e.g. So, you might want to take into consideration aspects like legibility, alignment, type size, and readability.
- **complain** (verb): to show dissatisfaction
e.g. It seems that most of our clients as well as the company staff have been complaining about it.
- **alignment** (noun): the way a text is displayed in terms of position
e.g. So, you might want to take into consideration aspects like legibility, alignment, type size, and readability.
- **improvement** (noun): getting better
e.g. How will those aspects help the web page improvement?
- **legibility** (noun): synonym of readability
e.g. That's why you ought to have a good type size. That will help with the legibility and readability.

Learning Points

The Future with "Will": Interrogative Form

You use **will** to talk about actions that you plan to do in the future.

To create a statement using **will**, you need to take into account the following information:

For **affirmative statements**, you use **will** and a verb in its base form.

Structure:

Subject + Will + Verb in base form + Complement

Example:

*I **will** design an amazing web page.*

For **negative statements**, you use **not** after **will** or the contraction **won't** and the verb in its base form.

Structure:

Subject + Will + Not + Verb in base form + Complement

Example:

*I **will not** use the left alignment in this web page.*

For **interrogative statements**, you need to place the auxiliary **will** at the beginning of the statement and a question mark "?" at the end.

If needed, you can include a WH in the beginning of the question to ask for specific information.

Structure:

WH (optional) + Will + Subject + Verb in base form + Complement + ?

Example:

*How **will** the layout achieve a balance between the flow of information and the eye movement?*

***Will** the new layout help our clients understand better what we do?*

Examples

- *Will you instruct me?*
- *How will those aspects help the web page improvement?*
- *Will you tell me what it is?*
- *That will help with the legibility and readability.*

Learning Points

What is a layout?

All of the items displayed on a web page, advertisement, book or magazine are part of the layout.

The layout is any published or printed work that you may find in a book, magazine, advertisement, or web site. The layout displays the organization of elements like titles, colors, images, etc.

It is important to present information in a friendly way for visitors, in the case of web pages, or readers, for magazines, advertisements, and books. That is why you have keep in mind that the layout's appearance must be organized; giving appropriate smooth flow of information for readers or visitors.

Examples

- *Layout is all the appearance a web page has. It includes some aspects such as titles, colors, graphics and information presented on the web page.*
- *The idea is that the layout achieves a balance between the flow of information and the customer's eye movement. That's why you ought to have a good type size. That will help with the legibility and readability.*
